U.S. Serial No. 10/764,485 Replacement Sheet

Sheet 6/13

- 1. The virtual interface device performs matching operation on the data frames according to classifying rules
- 2. The virtual interface device modifies the data frames according to classifying rules
- 3. The virtual interface device transmits the data frames to the data processing and dispatching device
- 4. The data processing and dispatching device finds a corresponding processing device according to the data class number in the data frames

- 6. The processing device processes the data frames and transmits them to the data processing and dispatching device
- 8. The virtual interface device finds corresponding device interface according to the data class number in the data frames
- 9. The virtual interface device modifies the data frames, i.e., deletes the data class number from the data frames
- 10. The virtual interface device outputs the data frames via the device interface
